

We are delighted to once again be taking part in the East of England Teaching Exchange – a regional, collaborative initiative designed to improve Key Stage 2 outcomes and ensure children are ready for the next stage of their education.

Funded through the DfE's RISE programme the Aims are:

- To raise Year 6 attainment, particularly for disadvantaged pupils
- To increase awareness and uptake of support from Teaching, English and Maths Hubs
- To build a sustainable, region-wide professional network beyond the initial programme.

An East of England steering group have put together a series of online networking and training opportunities which are free of charge to all participants and aimed at Senior Leaders, Maths/English subject leaders and Y6 teachers across the East of England.

You can find out more and book the free sessions here <https://eastenglandteaching.org>
