

Please join our [Peer Review programme](#)! Through deeper collaboration, schools are forming networks that allow for richer dialogue and a broader range of perspectives to be heard.

Peer Review is a strategy for organisational and systemic improvement. The VNET Peer Review approach makes this a priority and creates opportunities to develop both intellectual and social capital. It leverages the strengths we have in the network and provides great personal development and CPD opportunities for a variety of staff.

How does it work?

Whichever peer review group colleagues are joining, they will attend a half-day session to set out protocols and consider an effective review framework and activities. The VNET methodology of using an agreed framework supports cohorts in having a robust approach to their work which can then be shared as a credible external viewpoint.

Following the session, the schools will work in triads or tetrads to conduct reviews in each other's schools with a feedback session to the whole group on completion.

Peer Review half day training sessions, please book using the links below.
