

## The updated and expanded DfE's Reading Framework

### OVERVIEW

**The Department for Education's Reading Framework has been updated and expanded.**

The updated and expanded framework comes after KS2 SATS results revealed a drop in reading attainment levels from 75% of children meeting the expected standard in 2022 to 73% in 2023.

Updates have been made to assist schools in supporting children beyond key stage 1 and the EYFS. [What has been changed, and how do these changes affect schools?](#)

Read our latest blog where VNET's Principal Teaching and Learning Consultant, Emma Adcock, gives you an overview of the update.
